

# INSTRUCTIONS

## **CORRECT WAY TO USE TECHNOLOGY**

1. Use technology only for productive and meaningful purposes.
2. Limit screen time to avoid health problems and digital addiction.
3. Protect your personal information and use strong passwords.
4. Verify facts before sharing anything online to prevent misinformation.
5. Avoid cyberbullying and respect others' privacy on digital platforms.
6. Install updates and security software to keep your devices safe.
7. Use social media responsibly without engaging with strangers or harmful content.
8. Balance online activities with real-life interactions and physical activities.
9. Avoid downloading apps or files from untrusted or unknown sources
10. Log out from accounts after using shared or public devices.
11. Keep regular backups of important documents and data.
12. Use proper email and communication etiquette in digital platforms.

13. Dispose of electronic waste responsibly to protect the environment.
